A key life long learning skill you will need to use at the Drop In is to use search engines – in particular being able to **Google It!** and **YouTube It!** You need to be able to

- **use a search engine or search bar in a web address**
  - <http://www.google.com>
  - <http://www.youtube.com>
  - And/or typing a **question or phrase in the address line of your internet platform** ie. Safari; Internet Explorer; Chrome; Firefox; etc (or asking Siri or OK Google etc)

- **state your learning need using a clear ‘Search’ question**

To find out the time in Vancouver before phoning a cousin my question is ‘What is the time in Vancouver?’ I could probably get the same results with ‘Time Vancouver?’ (Lorraine uses iPhone ‘time?’ app when phoning nieces in London). Try different questions until you get the types of results you are looking for.

- **search through a list of results and decide on which might be useful** in meeting your learning needs.
